CATEGORIZATION OF STAY AND ADDITION OF FEATURES IN CFMS

CATEGORIZATION OF STAY AND ADDITION OF FEATURES IN CFMS

BACKGROUND & OBJECTIVE

- Earlier versions of CFMS and CCIS lacked a dedicated tagging mechanism for categorizing cases by their stage.
- The absence of stay-order tagging caused operational delays and reduced judicial process effectiveness.
- A comprehensive tagging mechanism was integrated into both CFMS and CCIS for stage-wise case categorization.
- The feature was uniformly implemented across the Principal Seat and all Allied Benches.
- Extensive training sessions were organized for court staff to promote effective utilization.

IMPACT, OUTCOME AND BENEFITS

- Case identification and stage tracking became quicker and more accurate.
- Time spent on manual categorization was significantly reduced.
- Stay orders and other case categories are clearly identified within the case management system.
- Uniform implementation ensured consistency in case tracking at all Benches.
- A more structured and transparent case monitoring system was established.
- Enhanced operational efficiency and responsiveness of the Court's case monitoring systems.
- Improved transparency in case management across the Principal Seat and Allied Benches. and accurate case tagging.

PROJECT DURATION

- 23.03.2025

LEADERSHIP

Justice Miss Aalia Neelum
The Hon'ble Chief Justice
