IT INITIATIVES 2025

AUTOMATED FULL BENCH MODULE FOR BENCH RECONSTITUTION

AUTOMATED FULL BENCH MODULE FOR BENCH RECONSTITUTION

BACKGROUND & OBJECTIVE

- Bench reconstitution previously relied on manual tracking to identify changes due to elevation, retirement, or movements of Judges.
- The manual process was time-consuming, error-prone, and frequently caused delays.
- A dedicated Full Bench Module was developed and integrated into existing court management systems.
- The module enables automated tracking, real-time notifications, and accurate identification of benches requiring reconstitution.
- Comprehensive training sessions were conducted for staff and stakeholders to ensure effective use.

IMPACT, OUTCOME AND BENEFITS

- Automated tracking eliminated reliance on manual processes, reducing errors and delays.
- The module integrates with judicial databases providing real-time access to updated Judge status information.
- Identification and management of bench reconstitution were streamlined considerably.
- Delays and disruptions in bench management have been minimized across the court system.
- Accurate and timely bench composition updates are now consistently maintained.
- Improved efficiency, transparency, and trust in court management processes.
- Reduced administrative burden on court management staff.
- Enhanced institutional responsiveness in managing judicial bench assignments.
