RECORDS MANAGEMENT SYSTEM – ENHANCEMENTS

RECORDS MANAGEMENT SYSTEM – ENHANCEMENTS

BACKGROUND & OBJECTIVE

- The Record Room Management System previously lacked classification options for certain judgment types.
- The absence of proper filters affected the efficiency of legal research and case retrieval.
- Enhancements were made by adding 'Larger Bench' and 'Is Reported Judgment' classification options.
- The objective was to improve accuracy and depth of case classification within the system.
- The upgrade supports better reporting and reference for judicial staff and legal researchers.

IMPACT, OUTCOME AND BENEFITS

- The system's ability to organize and retrieve judgments based on bench size was improved.
- Transparency in record management was increased through better categorization.
- Reporting accuracy for judicial and administrative purposes was improved.
- Legal researchers and court staff have more precise tools for case search and retrieval.
- Record room management reflects a higher standard of classification and organization.
- The system generates more accurate and useful reports for judicial administration.
- A more structured and accessible digital record-keeping framework is now in place.
- Enhanced transparency and accessibility of the Court's record management system.
- Reduced time and effort required to locate specific judgments or categories of cases.

PROJECT DURATION

- June & July 2025

LEADERSHIP

Justice Miss Aalia Neelum
The Hon'ble Chief Justice
