STOCK & STORE INVENTORY MANAGEMENT SYSTEM

STOCK & STORE INVENTORY MANAGEMENT SYSTEM

BACKGROUND & OBJECTIVE

- A new Inventory Management System has been developed to modernize and streamline the management of all store operations through the use of the latest technology as well as user friendly tools and Interface. It aims to ensure accurate tracking of inventory levels, real-time stock updates and efficient resource utilization. The system has automated manual processes, minimized errors and enhanced operational transparency. It has also provided advanced reporting and analytical capabilities for informed decision-making. Ultimately, the solution has been designed to improve efficiency, accountability and control across all departmental inventory stores/stock.

IMPACT, OUTCOME AND BENEFITS

- All departmental stores have been integrated through a single, unified software system to ensure centralized control and efficiency.
- The system provides real-time visibility into stock levels, procurement activities, and distribution processes.
- The system handles delivery and store inspections.
- The system generates pop-up and SMS/Email alerts for near-to-expiry and expired items.
- The system predicts future procurement on the basis of previous consumption patterns.
- Overall, the solution aims to enhance transparency, accuracy and resource optimization across all inventory stores/stock.

PROJECT DURATION

- 08.10.2025 to 18.12.2025

LEADERSHIP

Justice Miss Aalia Neelum
The Hon'ble Chief Justice
